Code	po9501
Status	Active
Adopted	September 18, 2023

#### 9501 - **SUMMER & ACADEMIC YEAR ACTIVITY SCHEDULING**

During summer months, teams/groups wishing to establish a student activity on the school calendar must schedule and have it approved by school administration prior to the event occurring. Summer months are defined, in this policy, as starting after the last day of school until July 31st.

Student activities during the month of August must be scheduled in advance on the school calendar and approved by school administration as well, but will take in consideration school team activities that are also beginning their seasons at various points during this month.

For the academic calendar, which is defined for this policy as occurring from the first day of classes to the last day of classes, all Wednesday high school student activities are expected to be completed by 5:30 p.m. On rare occasions, a coach/advisor can request to have their Wednesday practice time adjusted to ending no later than 6:30 p.m., with prior approval by school administration. There will be no after school student activities at the elementary or middle school on Wednesday.

For the academic calendar, which is defined for this policy as occurring from the first day of classes to the last day of classes, all Sunday student activities, which should only occur on rare occasions, must be scheduled in advance on the school calendar, and have prior approval by school administration.
